LinkedIn GitHub LeetCode

Professional Summary

Software Developer with experience in Python, C++, and Java, with strong foundations in Data Structures & Algorithms (DSA) and Object-Oriented Programming. Skilled in building scalable applications, debugging complex systems, and developing end-to-end solutions. Proficient in problem-solving and backend development, with experience integrating AI-driven features into software systems.

Experience

AI/LLM Developer Intern

docu3C (FinTech AI Company)

Aug 2025 – Present

- Developing scalable backend workflows and LLM-powered automation tools for financial document analysis, improving overall processing efficiency.
- Building modular ML and LLM systems using Azure OpenAI, Azure AI Foundry, Cognitive Services, and Azure ML Studio to enhance document analysis capabilities.
- Debugging and optimizing model pipelines, improving extraction accuracy and reducing processing time.
- Designing AI-driven workflows and interfaces for compliance and risk assessment.
- Deploying containerized AI services on Azure Kubernetes Service (AKS) to ensure scalability, reliability, and efficient resource utilization.
- Collaborating in agile environments and consistently delivering weekly milestones within defined timelines.

Member & Collaborator

Linpack Club, VIT Bhopal University

2024 – Present

- Contributed to AI/ML and technical projects through collaborative development.
- Strengthened analytical, problem-solving, and coding skills through workshops and hands-on activities.

Projects

PolarBrief AI – Legal Argument Analyzer

Owner & Developer

GitHub Repository

- Developed a scalable LLM-based system for analyzing legal documents using structured pipelines.
- Implemented an end-to-end workflow including extraction, classification, ranking, and report generation.
- Optimized data processing and debugging workflows to improve system performance and reliability.

Multimodal Emotion Recognition (WESAD Dataset)

Owner & Developer

- Processed physiological signals and built data pipelines for feature extraction.
- Evaluated ML models including Random Forest, AdaBoost, Decision Tree, and KNN using cross-validation techniques.
- Improved classification performance through feature engineering and model tuning.

Education

B.Tech in Computer Science and Engineering (Core)

VIT Bhopal University

Expected Graduation: 2027

- GPA: 8.60
- Key Courses: Artificial Intelligence, Machine Learning, Object-Oriented Programming, Data Structures & Algorithms

Skills

Programming: Python, Java, C++

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Debugging

AI/ML: PyTorch, TensorFlow, Transformers, LangChain, Groq API

Cloud: Azure AI Foundry, Azure ML Studio, AKS

Data Tools: Pandas, NumPy, SQL

OCR/CV: OpenCV, Tesseract OCR, pdfplumber

Soft Skills: Communication, Problem-Solving, Teamwork, Leadership

Certifications

- OOPS Concepts in C++ — CodeChef
- OOPS Concepts in Python — CodeChef
- Introduction to Large Language Models — Google Cloud Skill Boost
- Computer Networking Fundamentals — Coursera
- Fundamentals in AI and ML — Vityarthi
- Generative AI — Google Cloud Skill Boost
